VOLUNTEERING

7/2020

Creator, *Behind Your Ballot*

A resource for voters in Denver, Colorado with simple explanations of who is really behind the local and state ballot measures. Data was compiled and consolidated from various online resources.

5/2019

Speaker, *Denver Vue Meetup*

I presented a talk about component-based application architecture.

8/2019

Speaker, *Develop Denver*

DVLP DNVR (Develop Denver), two-day conference focused on inspiring and building community. I presented a talk about unit-testing JavaScript modules for front-end development.

8/2017

Team Lead, *Mozilla + Standford Accessibility Design Sprint*

The Open Innovation Team at Mozilla partnered with Standford University to engage and connect designers, developers, and accessibility experts. I lead decentralized teams, creating daily deliverables while exploring accessibility practices through a design process.

EDUCATION

State University of New York at Geneseo - Biophysics

2007 - 2012

EXPERIENCE

2/2018 - Present — Denver, CO

Web Developer, Frontend Lead, *By the Pixel, LLC.*

Small digital agency based in Denver, CO.

Highlights

- Consistently developed high-performing websites with high scores on Google Page Speed Insights using HTML, JavaScript, and CSS.
- Developed custom Webpack asset pipelines to modernize legacy front-end codebases.
- Developed JavaScript component-loading system to improve performance and maintainability across multiple projects.
- Created a Sass framework for reusability and rapid iteration.
- Lead efforts in improving website accessibility for all client projects.

11/2015 - 10/2017 — Denver, CO

Product Designer, Front-end Developer, *myStrength, Inc.*

Web-based software with research-driven mental-health resources.

Highlights

- Conducted user research, created wireframes and interactive prototypes to set the direction of the next version of the web-based software.
- Developed and designed modular components for the application using AngularJS.
- Identified and implemented design and development efforts to achieve 100% WCAG 2.0 AA compliance.

12/2011 - 1/2015 — Brooklyn, NY

Lead Front-End Developer, *Fdbk, Inc.*

Fdbk was a B2B company focused on providing real-time connections between business owners and their customers.

Highlights

- Created the product roadmap for meeting development, sales, and investment landmarks.
- Produced interactive prototypes and collected user feedback to inform product team.
- Designed, developed, and managed the front-end for the web application, and a backend service written in NodeJS.

5/2012 - 8/2012 — Syracuse, NY

Developer and Designer, *Startfast Centure Accelerator*

Startfast is a Techstars Network Venture Accelerator program in Central New York.

Highlights

- Provided design and development solutions for eight companies in Central New York.
- Led a team of design and development interns to build marketing websites and product design concepts under tight deadlines.
